The Third-Party Doctrine states that when individuals voluntarily share personal information with companies—such as banks, cellular providers, or internet service providers—they forfeit any reasonable expectation of privacy. This means companies may disclose user data to the government or law enforcement, either voluntarily or under legal compulsion, without a warrant. What is your opinion of the Third-Party Doctrine and its impact on privacy? Do you… *

Do you support allowing the government to conduct real-time surveillance on citizens (such as facial recognition and license plate readers) as an ongoing search for criminals, even when not looking for a specific suspect? Background: •Facial recognition technology scans people's faces in public places and compares them to government databases to identify individuals. •License plate readers automatically scan and track vehicle plates, logging their locations and movements. Do you support or oppose allowing this type of surveillance? *
