

National Results Spring 2026

N=1,377 | Margin of Error = $\pm 2.6\%$ | Dates: 5/16 – 5/20/2026

Section 1. Weighted Toplines

Weighted percentages based on the respondent-level results. The methodology statement is at the end of this document.

Q1. University Athletics Funding

Some states, like Wisconsin and North Carolina, have begun directing tax dollars to public university athletic departments. Would you support or oppose your state doing this?

Response option	Weighted %
Definitely support	10%
Somewhat support	9%
Somewhat oppose	12%
Definitely oppose	44%
Not sure / No opinion	25%

Party Affiliation Crosstab

Group	Definitely support	Somewhat support	Somewhat oppose	Definitely oppose	Not sure / No opinion
Overall	10%	9%	12%	44%	25%
Republican	4%	9%	5%	59%	23%
Democrat	15%	8%	20%	33%	24%
Independents	12%	11%	12%	34%	31%

Q2. Gas Prices And Spending Habits

Would you say that recent changes in gas prices have impacted your regular spending habits?

Response option	Weighted %
Yes, significantly	47%
Yes, moderately	19%
A little	17%
Not at all	14%
Not sure	3%

Party Affiliation Crosstab

Group	Yes, significantly	Yes, moderately	A little	Not at all	Not sure

Never	26%
No answer	16%

Methodology note

In keeping with the AAPOR Transparency Initiative, any public release of this study should disclose the sponsor and research organization, exact questionnaire wording, population under study, sample source and recruitment method, mode(s) of data collection, field dates, unweighted sample size, weighting variables and targets, data-quality procedures, and the general limitations of survey research. The following methodological note is consistent with the Initiative.

This study captures public opinion of registered voters across the United States. The survey was sponsored by Overton Insights and conducted by employees of Overton Insights. Respondents were recruited from a voter-file sample of registered voters with available cell phone numbers supplied by L2 using peer-to-peer SMS text-message invitations. A total of 125,317 text-message invitations were sent between May 16 and May 20, 2026, and 1,377 completed interviews are included in the final dataset. Respondents who entered the survey completed a self-administered online questionnaire in English. No incentive or compensation was offered for participants' time.

This report presents weighted results and the exact wording of the questions reported. Results were weighted on gender, age, education, and race to reflect the registered-voter population, using targets from voter files. Prior to weighting and analysis, the data were reviewed using quality control measures, including duplicate screening, speeder removal, and attention/logic checks.

As with all survey research, the results are subject to potential sources of error, including nonresponse bias, coverage limitations, measurement error, weighting effects, and question-wording or order effects.

Under a simple random-sampling assumption, at 95% confidence, the maximum unadjusted margin of sampling error for $n = 1,377$ is approximately ± 2.6 percentage points, calculated as $1.96 \times \sqrt{(0.50 \times 0.50 / 1,377)} \times 100$, without a finite-population correction. This benchmark is not adjusted for weighting, clustering, unequal selection probabilities, or other design effects. It is not a design-adjusted margin of error for the weighted estimates and does not include potential bias from nonresponse, undercoverage, or measurement error. It applies to the full sample; estimates based on smaller subgroups or routed questions have different sampling uncertainty.
